## Experience

---

### Germin8

July 2024 – Present

*Junior Software Engineer*

*Panaji, Goa*

- Developed data enrichment microservice processing 100K+ daily Twitter posts with 99.8% accuracy using HDFS and Kafka streaming
- Built Voice Agent with React and GenAI integration, reducing customer response time by 70% for 1000+ daily interactions
- Optimized system performance: reduced pipeline latency by 80%, dashboard load time from 8s to 2s via React state management
- Led cloud infrastructure optimization with microservices architecture and async logging (2M+ daily events), achieving \$15K monthly savings
- Maintained CI/CD pipelines using Jenkins, ensuring automated testing and deployment with 99.9% uptime

### Piramal Group

July 2023 – December 2023

*Data Analyst Intern*

*Mumbai, Maharashtra*

- Analyzed sales and HR data using Python (Pandas) and Excel, improving salesforce efficiency by 15% through optimized tracking
- Developed automated reporting system using Python and statistical models, reducing attrition rates by 20%
- Created interactive dashboards using Matplotlib and Seaborn for effective KPI tracking and trend analysis

## Education

---

### Birla Institute of Technology and Science, Pilani

2020 – 2024

*B.E. in Electrical and Electronics Engineering*

*CGPA: 7.89/10.0*

- Relevant Coursework: Data Structures, Algorithms, Database Systems, Operating Systems, Computer Networks

### Avalon Heights International School

2018 – 2020

*ISC Science*

*Grade: 92.4%*

## Projects

---

### PulseConnect – AI-Powered Meeting Room Web App

Dec 2024 – Jan 2025

- Built full-stack platform using React/TypeScript, Node.js, and MongoDB with WebRTC for real-time video/audio streaming
- Implemented AI gesture detection (TensorFlow.js), speech-to-text transcription, and Docker containerization

### WattWise: Energy Management System

Feb 2024 – May 2024

- Developed Django/React web application with JWT authentication and real-time energy consumption tracking
- Created interactive dashboards using Chart.js and implemented data analysis tools with Pandas for trend analysis

### T20 World Cup Data Analysis

Nov 2023 – Dec 2023

- Built ETL pipeline using Python/Pandas for cricket match data, implementing web scraping and normalized database schema
- Developed interactive Excel dashboard using pivot tables and VBA macros for comprehensive cricket analytics

## Skills

---

### Languages & Frameworks

*Java, Python, JavaScript/TypeScript, React.js, Spring Boot, Angular, Node.js, Express.js, Django*

### Technologies

*Docker, MongoDB, MySQL, GCP, Apache Kafka, HDFS, Git, BigQuery, Nginx, Solr, Redis, Jenkins*

### Concepts

*OOP, DSA, DBMS, System Design, Microservices, ETL, REST APIs, CI/CD, Statistical Analysis*
